

How To Mount Battery Inside Wisent Handlebar With Fix Clip System

Fix Clip system contains clamping ring and spike.

Place the clamping ring in the notch of the battery (opposite cable).

Compress the clamping ring and push the battery into the handlebar.

Push the battery till the notch is located at the end of the oblong hole.

Push the small spike into the oblong hole. The nose of the spike has to fit inside the notch of the battery.

Press the spike against battery with brake lever clamp or grip.
