

Twister Ring WE01 Magnet Alignment

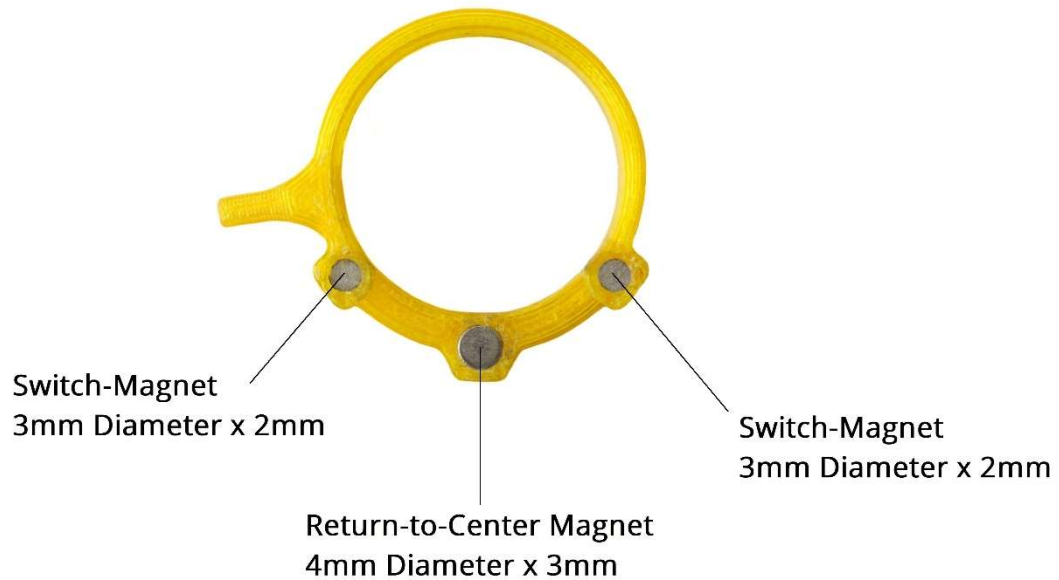

Twister Ring WE01 has three parts: Sleeve, Twister Ring and Magnet Ring

Twister Ring contains three magnets: Two Switch-Magnets and a Return-to-Center Magnet. The Magnet Ring contains one magnet.

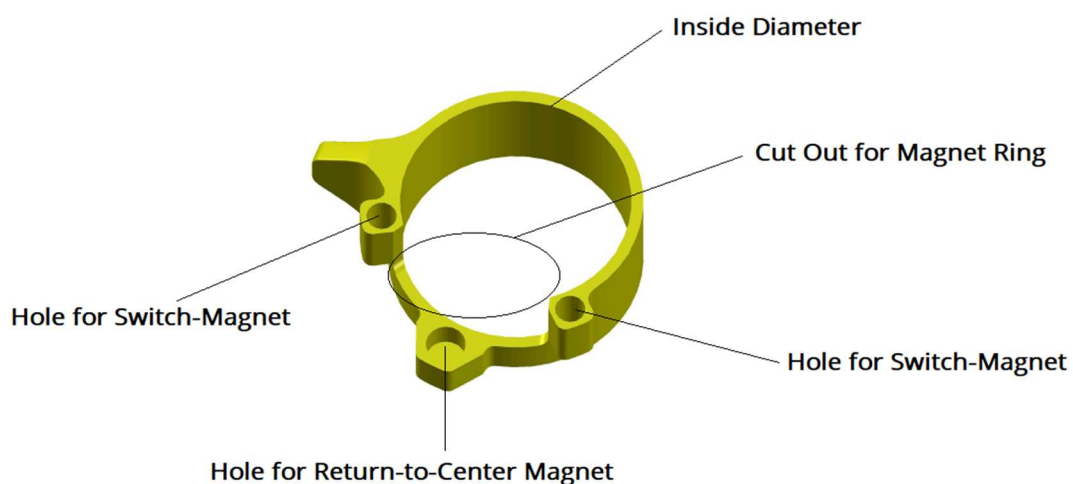

3D printed Twister Ring with glued in magnets

All three magnets have the same north pole/south pole orientation (the magnet of the Magnet Ring attracts the magnets of the Twister Ring).

When you are designing your own Twister Ring, important dimensions are:

- Inside diameter of Twister Ring
- Location of the three magnets
- Cut out for the Magnet Ring

The magnet sets for the Twister Ring you can get direct from Zirbel.
